Biography

I currently work full time at an independent community pharmacy in the small town of Hagersville, Ontario. I ensure the safe and accurate dispensing of medications while using my full scope of practice. I am familiar with the challenges of balancing the demands of dispensing with providing exemplary clinical services, be that with medication reviews, prescription adaptations, prescription renewals, or prescribing for smoking cessation and minor ailments. I also spend 1-3 days each month working with the Ontario College of Pharmacists as a Quality Assurance Coach and Quality Assurance Assessor, to help teach fellow colleagues how to optimize their practice and ensure the standards of our profession are upheld.
